

# MEI CASHFLOW® 8000

## THE COMPLETE PAYMENT SOLUTION THAT WILL REVOLUTIONISE YOUR BUSINESS

Since the development of the first electronic coin acceptor, MEI has created several families of highly innovative payment systems that help operators **maximise sales** and **minimise costs**.

With the introduction of **CashFlow® 8000**, MEI has created the **complete payment solution** – a unique combination of proven and reliable CF7000 platform and new advanced features that will guarantee increased operational efficiency and bottom-line profit.

- A Simple way to deliver full audit data through a single point via usb, irda or Bluetooth® with Data Merge™
- Better cash control with cash management feature
- The lowest cost cash & cashless combination with integrated cashless reader
- These new features will give you the tools and business information you need to better manage your field base

The Complete Payment Solution

# MEI CASHFLOW® 8000

## THE AUDIT MASTER

**CashFlow® 8000** with **Data Merge™** is an enhancement of the CashFlow® 7000 series that will revolutionise your business by **simplifying** the entire **audit collection** process. It is easy to use, yet powerful in how it helps operators manage revenue and business information.

### SIMPLE & COST EFFECTIVE

CF8000 supports a variety of audit collection options, including USB, IrDA and Bluetooth®. Whether new to audit and looking for an entry level solution or integrating the CF8000 into your established management software, audit collection could not be simpler:

- Providing a single point of audit on each machine
- Reducing mistakes
- Reducing training requirements
- Eliminating 'lost' audits
- Removing the complexity of audit collection

### COMPLETE AUDIT

The CashFlow® 8000 gathers all available sales and transaction records from the machine. All information is merged into a single EVA/DTS formatted file that can be imported directly into you existing audit management software or analysed using the MEI Audit & Cash Management Tool.

- Speeding up audit collection
- Providing more comprehensive, consistent and accurate information
- Recording machine ID and its location
- Providing you with all the information you need to manage you machine base

### ACROSS YOUR FIELDBASE

All benefits of the CF8000 can be extended onto existing fieldbase with MEI Vending Audit Module (VAM) – a cost effective filed upgrade tool that allows standardising audit collection process.

- Offering one simple audit collection point in every machine
- Merging data from the VMC and payment devices into one EVA/DTS file
- Delivering consistent audit information from every machine
- Eliminating mistakes
- Compatible with CF690, CF7900 or other payment devices that provides EVA/DTS data

**Low cost**  
audit collection  
option through  
a **USB drive**

**Contactless**  
audit collection  
through  
integrated **IrDA**  
& **Bluetooth®**

The Complete Payment Solution

# MEI CASHFLOW® 8000

## 3 STEPS TO COMPLETE CASH MANAGEMENT

Not only does the CF8000 ensure **full cash control** and **shrinkage reduction**, it also optimises the amount of change held in every machine releasing extra cash, which can be invested elsewhere.

### SONAR:

Patented Sonar technology accurately monitors the amount of change in tubes in real time.

### AUTOFLOAT™:

Autofloat™ technology constantly monitors every inserted coin and ensures that only change that is needed is retained in the machine. By doing that CF8000 allows to minimise the amount of cash tied up in the vending machines.

### INTEGRATED REAL TIME CLOCK:

Every time the machine is opened the CF8000 records and time & date stamps\* any changes. Any discrepancy or shrinkage are recorded in EVA/DTS format and communicated during the audit collection.

All data is compatible with the industry back end software systems or it can be imported into simple MEI Cash Management Software allowing easy reporting or Excel based monitoring.

\* guaranteed for 10 years

## CASHFLOW® 8000 WITH INTEGRATED CASHLESS READER

CF8000 offers more payment options without the need for additional hardware.

- Reduced duplication of electronic components delivers the **lowest cost cash & cashless solution**
- Complete functionality of a cashless system including bonus periods and discounts
- Total price flexibility with possibility of price increments from 1c
- Compatible with mei-pay e-key or multi bezel that offer an option of taking audit via audit key
- Available media include keys, tags, cards, self-adhesive stickers and more
- All media can be customised with individual logos
- Freedom of MIFARE® open standard

The best of  
**coin & cashless**  
worlds in one  
product

The Complete Payment Solution

**SYSTEM BENEFITS AT A GLANCE:**

- Based on CashFlow® 7000 - the industry standard with 1.000.000 units working reliably worldwide
- Compatible with all machine types
- Delivering full machine audit from one source
- Equipped with USB configuration and cloning capability
- Wider choice of payment options with integrated cashless reader
- Easy to use, large intuitive display
- Intelligent algorithms optimise the change payout
- Low cost of ownership: highest level of reliability
- Fully accessible coin path allows clearing debris without tools
- Total price flexibility
- Five configurable payout denominations
- Water and jam resistant
- Additional MDB peripheral connector allows a note reader to be incorporated

**COMPATIBILITY:**

- Audit fully compatible with EVA/DTS standard
- Windows based service tools compatible with Windows 98, 2000 and XP
- Compatibility with existing management systems

**TECHNICAL DETAILS:**

- Acceptance rate: > 97%
- Dimensions: 371 x 138 x 80 mm
- Power requirements: 24 VDC = Executive, 34 VDC = MDB
- Interfaces: MDB, EXEC
- Connectivity: USB, IrDA, Bluetooth
- Support tools: STS Software
